

GOKULAVANAN B

Full Stack Developer | MERN Stack Engineer

gokulavananofficial@gmail.com | +91 9750179791 | github.com/gokulavanangk-ai | linkedin.com/in/gokulavananb

PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science graduate specializing in MERN stack development with proven expertise in building scalable web applications, RESTful APIs, and machine learning-integrated solutions. Proficient in React.js, Node.js, Express.js, and MongoDB, with hands-on experience deploying production-ready applications using Docker, AWS, and CI/CD pipelines. Skilled in TypeScript, JWT Authentication, and agile development workflows. Passionate about writing clean, maintainable code and delivering high-performance user experiences.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, HTML5, CSS3, Bootstrap 5

Backend: Node.js, Express.js, Flask (Python), REST API Design, JWT Authentication

Databases: MongoDB, MySQL, CRUD Operations

DevOps & Cloud: Docker, AWS (EC2, S3), GitHub Actions (CI/CD), Vercel, Render

Tools & Platforms: Git, GitHub, Postman, VS Code

Other: NLP Integration, ML Model Deployment, Responsive Design, Agile/Scrum

PROJECTS

Toxic Comment Classifier System | React.js, Node.js, Python, Flask, NLP/ML 2026 – Final Year

- Engineered a full-stack machine learning web application achieving ~91% classification accuracy using a pretrained NLP model served via a Python Flask REST API.
- Processed 500+ real-time comment requests with sub-200ms response time by integrating a React.js frontend with a Node.js middleware layer.
- Designed an end-to-end ML deployment pipeline covering 3 toxic content categories: threat, insult, and obscenity.
- Implemented CORS-enabled REST API endpoints connecting the Python ML backend to the Node.js service layer, ensuring seamless cross-origin data flow.

Glazing Clip Optimizer | React.js, Node.js, Express.js, MongoDB 2025

- Built a cutting optimization web application that reduced aluminum glazing clip material waste by ~18% through automated cutting plan generation.
- Developed an algorithm handling 10+ clip-length combinations with real-time efficiency calculations for 12-foot aluminum rods.
- Built RESTful CRUD APIs with Express.js and MongoDB, enabling persistent storage and retrieval of 100+ cutting plans.
- Delivered a responsive React.js UI that reduced manual calculation time by 70% compared to legacy spreadsheet-based workflows.

CERTIFICATIONS

MERN Stack Development Certification 2025

Win Institute, Madurai

- Completed a comprehensive MERN stack program covering production-ready application development with React.js, Node.js, Express.js, and MongoDB. Built projects featuring responsive UIs, RESTful APIs, JWT-based authentication, and database-driven full-stack features.

EDUCATION

B.Sc. in Computer Science - The American College, Madurai, Tamil Nadu 2026

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Web Technologies, Software Engineering.
